

## Teaching and Learning

### **Vision**

We are privileged to work in a community where we make a significant difference to students' lives and futures every day. Our students are entitled to the best in education so they have the powerful knowledge, skills and experiences to be successful in and benefit society. We embrace opportunities for professional development so that students benefit from our improved practice.

Our ambition is to have an expert teacher in every classroom.

We will:

- Plan for long-term learning rather than short-term performance.
- Deliver a well-sequenced and knowledge-rich curriculum.
- Use up to date research and the science of learning.
- Explicitly teach academic vocabulary and plan regular opportunities to read.
