

Y6 Science transition tasks:

Task 1:

Imagine you could see this in your new Science lab:

- Identify the unsafe behaviours by circling/colouring the picture or listing them.
- Create a poster for your top 5 safety rules

Task 2:

Select one of these three experiments and try it at home.

Write a few sentences describing what you did and what you found out.

Experiment 1: Sugar or salt?

- Can you dissolve more sugar, or more salt, in a glass of water?
- Make a prediction
- Decide how will you investigate this.
 - (tip: keep the volume and temperature of the water the same each time)
- Carry out your investigation then write about what you found out.

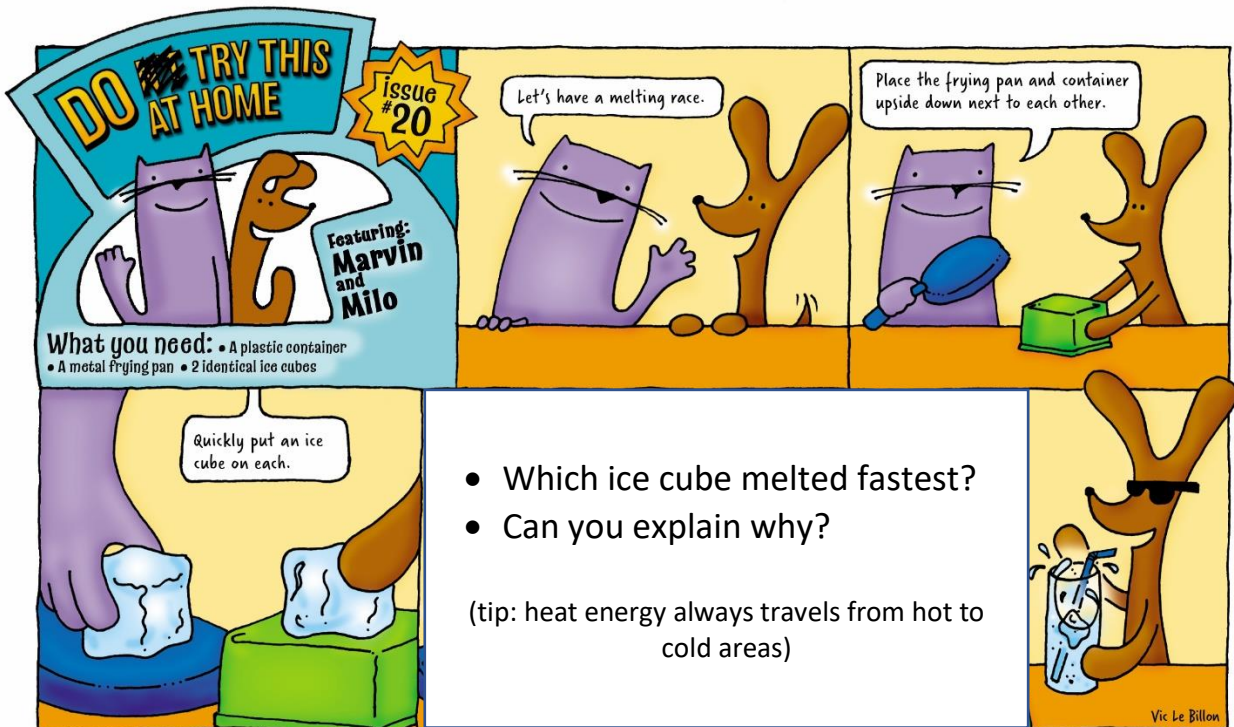

Experiment 2: Spinning straw
